

Photographer and 3D Artist

My work is about surface and texture, the passage of time and water across the seen environment. It is about landscape and human interaction.

Photography is predominately colour and digital, printed to archive standards. Painterly images seize the pictorial flat from the three dimensional world. Boats populate many of these photographs - especially from the dark harbours of Arctic Norway and Iceland where low light and snow carpet offer subtle lighting and unexpected vibrancy.

I work instinctively. These are images created within the camera and presented without retouching.

I am also exploring the digital potential - particularly the deliberate 'layering' of landscape images to sandwich time and movement in a single print.

I teach digital photography and work regularly with community and disability arts groups; running several lottery funded photography projects since 2002. These include a period as photographer in residence at a Day Centre for Disabled People in Bristol.

In 2004 the Royal National Lifeboat Institution purchased several photographs for the new Lifeboat College in Poole, before commissioning more work.

Current projects include work with Holton Lee in Wareham to establish a digital photography resource and an arts and disability exhibition for Dorset Art Weeks 2006.

I also work in wood and ceramics, creating clocks and assemblages from the findings of local and distant beaches.

Selected galleries and exhibitions:

2005	' extreme ', Study Gallery, Poole
2004	Discerning Eye, Mall Galleries, London
2004/5	Otterton Mill, Devon
2005	Boilerhouse Gallery, Corfe Castle
2004/5	Ocean Contemporary, Cornwall
2004	Art at Storm, Dorset
2003	Woodlane, Doone
2003/2005	Purbeck Art Week
2002/2004	Dorset Art Weeks
2002	Beatrice Royal, Hampshire
2000 - 2004	Wessex Fine Art and Ceramics, Dorset

"I love your 'take' on the world...the unremarked detail, texture of ordinary things and the process of change..."

Richard Jeffery is self taught, and lives and works in Dorset, on England's south coast.
